Total Zipper Technology

Feel secure with added safety

The new child resistant technology of Child-Guard™ is a revolution in the flexible packaging industry. Customer-friendly and ergonomic, this system is adaptable to many film structures to perform under many design demands. Plus, it uses much less materials than alternative packaging options.

FEATURES

- Designed to meet the requirements of child resistance as stated in the U.S. Poison Prevention Packaging Act, Title 16 CFR 1700
- Compliant with ASTM D3475, Standard classification of child-resistant packaging
- Performs with a wide range of sizes, configurations, and multiple film structures for different performance needs
- Utilizes significantly less materials than alternative options for child resistance
- Simple and cost-effective

Contact one of our track and slider sales professionals today, and we'll find a solution for virtually any flexible packaging need.
